

Screenshot - Registration Center Search

Each task description must contain five components: what (definition), why (purpose), how (steps), when (timing/schedule/time estimates), and system/access requirements (permissions) before any action

Information Processing, Learning Style

Location

Main content area

Inclusivity Bug

Missing complete information about the registration process and requirements

Associated Bug Categories

Lack of guidance about task

Potential Fixes (Recommendation)

Add clear information about what documents are needed, why registration is required, and what the complete process entails

All actionable UI elements must be clearly marked/have visual affordance

Computer self-efficacy, Information Processing

Location

Search interface elements

Inclusivity Bug

The search button and 'Locations near me' button lack clear visual affordances

Associated Bug Categories

Lack of guidance about specific features

Potential Fixes (Recommendation)

Add hover states, better button styling, and clear visual indicators for interactive elements

Complex or dense content should be layered with clear expansion mechanisms for additional details.Ê

Information Processing, Motivations

Location

Supporting Documents section

Inclusivity Bug

List of Supporting Documents section appears empty/unclear and information hierarchy is not well structured

Associated Bug Categories

Unclear action requirements - clutter/overwhelming

Potential Fixes (Recommendation)

Implement a clear hierarchical structure for document requirements with expandable sections for details

Any request for user data must be accompanied by a clear explanation of its purpose and usage

Risk Aversion, Computer Self-Efficacy

Location

'Locations near me' button

Inclusivity Bug

No explanation for why location access is needed when using 'Locations near me' feature

Associated Bug Categories

Privacy concerns

Potential Fixes (Recommendation)

Add clear explanation about why location access is needed and how the data will be used

System must provide immediate, persistent, and contextual feedback to indicate current status/outcome

Risk Aversion, Computer Self-Efficacy

Location

Search functionality

Inclusivity Bug

No loading indicator or feedback when searching for locations

Associated Bug Categories

Forced waiting period

Potential Fixes (Recommendation)

Add loading indicators and clear feedback for search operations
