Inclusivity Bug Report

June 04, 2025

Screenshot - Manage Vid Screen

When task description includes additional information, it should allow exploration of optional features or insights, via expandable sections or tooltips.

Information Processing, Learning Style

Location

Throughout the VID management interface

Inclusivity Bug Category

Lack of guidance about task and/or data usage

Bug Description

Lack of explanatory information about what a VID is and its purpose

Potential Fixes (Recommendation)

Add an information icon or expandable section explaining what a VID is, its purpose, and when to use different types

The same concept must be referred to consistently using the same term throughout the interface Information Processing, Learning Style

Location

Page title and VID type label

Inclusivity Bug Category

Lack of guidance about task

Bug Description

Technical terms like 'VID' and 'Perpetual VID' are used without explanation

Potential Fixes (Recommendation)

Add tooltips or help text explaining technical terms in user-friendly language

Complex or dense content should be layered. Show essential content first, with 'Learn More' or expandable details for selective exploration.

Information Processing, Learning Style

Location

VID details section

Inclusivity Bug Category

Error messages - no warning about error prone conditions

Bug Description

All VID information is displayed at once without proper organization

Potential Fixes (Recommendation)

Organize VID information into collapsible sections (e.g., Basic Info, Details, Actions) for better readability

If user data is requested, show an on-demand explanation of its purpose or usage and whether it's required or optional.

Motivations, Computer Self-Efficacy

Location

VID details display

Inclusivity Bug Category

Lack of guidance about task, Unexpected screen/output

Bug Description

No explanation of what the system does with the VID or why certain fields like 'Transaction Left' exist

Potential Fixes (Recommendation)

Add clear explanations for each field's purpose and how the information will be used
